Hi Raffi!

I hope you're having a good Summer. This is Faye Turcotte (I participated in the Winter '26 Epicenter Career Fellowship supporting the DGSOM's alumni database identification system).

I recently finished a HR internship at Nike, and I just wanted to reach out to thank you because there were so many skills I got to practice with the Epicenter fellowship that allowed me to be successful at Nike. From creating and following a timeline, to researching trends and pain points, to presenting weekly progress to a client, I was able to feel much more confident in my internship because I'd already had experience in a real world setting.

One of my coworker's daughter's coffee chatted me and was asking me about my college experience, and I told her the best thing I did was seek out programs like yours, and that my biggest regret was not finding them sooner. Thank you again!

Best.
Faye
