More girls in the IT industry. The contribution of Together4Armenia American-Armenian expert

Have you ever thought that women's involvement in the most dynamically developing sector in IT is the highest in the world? It is 32 percent higher than in the European Union, the United States, and Canada.

Women and the Information Society NGO has been engaged in IT development in Armenia for several years, creating equal employment opportunities for young people. NGO projects create serious prospects for girls aged 10-18. here they learn to compete and present competitive IT products on the market.

Raffi Simonyan, an American who has a rich experience in the field of IT as a programmer, has assisted the organization with his professional skills and experience. IT is also interested in IT management and business organization.

"After the velvet revolution, when I received an email and learned about the possibility of consulting Together4Armenia in Armenia," Raffi tells.

The Together4Armenia platform creates a fast and effective connection between Armenian and foreign professionals and local communities. This time it also helped Raffi's interest to be quickly turned into action.

Narine Abazyan, Chair of Women and Information Society NGO, says that several online discussions with Raffi have been beneficial to the organization's future activities.

"We presented our work, and Raffi mentioned what can be useful. He has also opened a space in the wiki so that we can upload the material at our disposal and work together. It's important to review our past experiences and to prevent mistakes in the future, "says Narine.

"My role is, in essence, to help this important initiative find international grants so that it can do its daily work and pay for property and services," says Raffi.

At present, the organization is working on a project at the development stage, which will allow girls to gain new knowledge and skills in marketing, information technology and other related

fields.

"Women and Information Society" for the third consecutive year will participate in the "Technovatsya Armenia" competition, which is part of the Technovation International Competition. The aim of the competition is to encourage participants to help them solve problems in their communities through innovation, particularly by creating mobile applications. Raffi wishes to be a jury member of Technovatsia Armenia contest.

It is encouraging and encouraging that such important initiatives are targeted at the expertise of foreign experts around the world. Let's hope that such initiatives will be infectious for both experts and local organizations.
